DELIVERABLES

Access to tools,
frameworks, Guidelines &
resources used in Social
Impact Assessment
Membership in the Social
Impact Practitioner
Community of SAN, India

The SAN India Masterclass (August 2024) was a game-changer for my career in social auditing. The workshop masterfully covered VMVOA, REESCI, SROI, and SDG-aligned impact assessment techniques.

Ms. Banu, Ms. Latha, and Ms. Archana's engaging facilitation brought clarity to complex concepts, empowering me to draft a robust Social Impact Report. The tools, mentorship, and certification provided by SAN India has been instrumental in my professional growth.

This transformative program is a must for anyone aiming to excel in social impact evaluation & assessments.
Thank you, SAN India, for an inspiring and skill-enhancing experience!

Mr. Sridhar Santhanam,
Program Director,
Mission Samriddhi

RESOURCE PERSONS

Social Impact Practitioner workshop personally helped me to qualitatively and quantitatively understand the impact of services being offered by the Social Sector to its stakeholders. The interactive nature of the workshop coupled with breakout hands-on sessions, focused on application of concepts. It helped me internalise the concepts very well.

The trio's (Archana, Banu and Latha) delivery of content bundled with their rich experience across multiple settings gave very valuable insights. The mentoring for the project helped internalise the constructs - VMVOA, REESS, Impact analysis, Stakeholder mapping...

I had nominated myself to this programme to understand the impact of my company's CSR contribution and today I feel very confident about my decisions in allocating CSR funds across institutions based on their commitment to their purpose and the resultant impact.
